Subject: RE: Introducing Naomi Bernardo to Dr. Raymond Thompson - Hunters Pt air concerns

The only correction I can see is your reference to a white cloud coming from the Shipyard. I only remember Dr. Thompson referring to the 2001 fire on Parcel E. He said that nearby community members witnessed green and yellow smoke coming from the landfill towards their direction on the hill.

Subject: Introducing Naomi Bernardo to Dr. Raymond Thompson - Hunters Pt air concerns

Dear Naomi,

I hope you are well. I wanted to introduce you to Dr. Raymond Thompson. He has long-term deep experience with community environmental issues. He let me know about some concerns regarding air quality.

Dear Dr. Thompson,

It was good to take a tour with you this Wednesday and learn about your air quality concerns. I wanted to introduce you to Naomi Bernardo, Air Quality Inspector II, BAAQMD. She visits the Hunters Point area every day and documents her observations of air quality concerns.

Naomi, Dr. Thompson drove me and Jackie Lane, USEPA Community Involvement Coordinator, around the Hunters Point neighborhood the morning of Wed, 9/24/2014. We observed these dust concerns:

10:50 am - Shamrock Moving & Storage located on Fairfax near Phelps was generating dust (415-731-2777). Jackie told them they were generating too much dust and needed to water it down

11:30 am - Recology facility was not applying dust suppression at Cargo and Jennings

11:35 am - dust tracked onto the road from truck 180, license plate 8TI5999 driving from the direction of the Cemex facility on Amador toward Illinois

In addition, Dr. Thompson said that community members had complained about ongoing problems at these locations:

Circosta metal recycling plant on Evans - inadequate dust suppression and workers not wearing respirators

Lennar construction inadequate dust suppression

White clouds from the Naval Shipyard that could impact the Carver Elementary School, the Head Start at Phelps X Oakdale, garden and children's playground at Oakdale and Ingalls.

Dr. Thompson and Jackie, please of course make any corrections or additions if I have made any mistakes or missed anything.

Dr. Thompson did note that PG&E appears to control its dust well.

Below is contact information. I hope you two can connect.
